XM Radio should be allowed to broadcast to their subscribers both Traffic and weather. They offer better and more accurate traffic info than local channels, which I don't bother listening to anymore. I don't want to have to listen to 20+ minutes of ad's per hour to get traffic. Don't let National Association of Broadcasters tell me that I have to listen to their poor broadcasting to get traffic.

I request you reject NAB's petition 04-160..
